*TOTAL MATH RAW SCORE

To calculate the total math score you will need to average the raw scale score for Applied Math and the raw scale score for Math Computational and convert this to an Educational Functioning Level.

You cannot average the Applied Math and Math Computational grade equivalent and get an accurate picture.

For example:

Mary enters your program and scores a scale score of 425 in applied math (grade equivalent of 3.6) and a scale score of 761 in computational math (grade equivalent of 12.9). To calculate her Educational Functioning Level for total math raw score you would do the following:

$$(425+761)/2=593$$

593 should be converted to an educational functioning level of 5. You do not need to complete a math youth assessment form for Mary.
